

I personally think that the NAB should just mind there own business. I am a loyal listner of XM satelite radio. I benifit every day from the LOCAL TRAFFIC AND WEATHER. I use it every day to navigate big cities to tell me where the big traffic jams are and tell me what the weather is doing in areas that I am heading. I have never seen a service provided like that from the NAB. So as far as I am concerned they can just keep there fingers out places they don't belong.

I also think that the FCC should REJECT the NAB's petition 04-160 just for the simple fact they dont provide any service like XM.

I am totally happy with the services that are provided by XM satilite radio. and would be VERY disapointed if the FCC makes them pull the best part of the services they provide. The only reason that I bought XM was for the TRAFFIC AND WEATHER, Dont get me wrong the music is nice but the main reason I bought it was for the traffic and weather.

Thank's

Maxson Transport

XM satilite radio listiner.
